

Rincon Power introduces the new RXC60-B1 1000V/600A continuous duty contactor

Carpinteria, California – Rincon Power, a pioneering force in advanced power management, is pleased to unveil its latest innovation – the RXC60-B1 contactor. Engineered to redefine the boundaries of performance, reliability, and safety, this cutting-edge contactor sets a new standard for high-power applications across multiple industries. This ceramically-sealed contactor safely isolates high voltage systems in a compact, robust package. Designed and assembled in Carpinteria, California, this 600A / 1000V continuous-duty contactor joins Rincon Power’s ever-expanding portfolio of hermetically sealed, high voltage contactors, relays, and manual disconnect switches.

Recognizing the critical importance of safeguarding both equipment and personnel, the RXC60 contactor boasts a hermetically sealed enclosure. This design ensures protection against harsh environmental conditions, including moisture, dust, and corrosive agents. Such robust shielding ensures a prolonged lifespan, minimizes maintenance, and guarantees consistently superior performance. The single pole, single throw (SPST) design is available with an optional SPDT auxiliary contact providing both normally-open and normally-closed feedback for maximum design flexibility in any application including high voltage safety circuits, status feedback, or weld detection.

The RXC60 has been engineered to provide high-speed switching, low contact resistance, and minimal power loss. Its advanced internal architecture empowers industries to optimize their operations while maintaining precise control over power distribution. Whether utilized in renewable energy systems, electric vehicle charging infrastructure, industrial machinery, or beyond, this contactor ensures the highest standards of performance.

"As technology advances and industries evolve, the demand for robust and high-performance power management solutions is greater than ever," said Brian Munari, Business Development Manager at Rincon Power. "With the introduction of the RXC60, we're ushering in a new era where power-intensive applications can be managed with unmatched precision, efficiency, and peace of mind."

Rincon Power, LLC
6381 Rose Lane, Suite A
Carpinteria, CA 93013

Rincon Power is a leading supplier of high-performance contactors, relays, and switches designed to meet the needs of an electrified future. Our products are hermetically sealed and engineered to provide superior performance in harsh environments and demanding applications. Our world HQ is located in Carpinteria, California where our team of industry veterans and seasoned professionals draws on deep technical experience with product design, testing, and manufacturing all under one roof in a state-of-the-art facility. Let our experience be your competitive advantage. For more info, please visit www.rinconpower.com
